KENYA UNION OF SAVINGS AND CREDIT CO-OPERATIVES LIMITED

(KUSCCO LIMITED)
(the Company)

Company No. G.000008 (Guarantee) Co-operative Registration No. CS/S/2

PETITION FOR COMPULSORY WINDING-UP AND PRESERVATORY ORDERS

NOTICE is given that on 17th March, 2026, a petition was presented to the High Court of Kenya at Nairobi (Commercial and Tax

Division) in Insolvency Petition No. HCCOMMIP/E17/2026 by RUPSA Regulated NWDT SACCO Society Limited (a SASRA-regulated non-withdrawal deposit-taking SACCO), seeking an order for the compulsory winding-up of the Company on the grounds of inability to pay its debts under sections 384(1) *(a),* 384(1) *(c)* and 384 (2) of the Insolvency Act, 2015.

The insolvency of the company rests on three independent grounds. A statutory demand for KSh. 108,849,922.97 served on 23rd February, 2026 was not met within the statutory period: section 384 (1) (*a*). The Company's own director admitted on oath before the Co-operative Tribunal on 1st June, 2024 that the Company's bank accounts were overdrawn: section 384(1)(c). A Pricewaterhouse Coopers forensic assessment (September 2024) confirmed total liabilities of KSh. 17,700,000,000 against total assets of Kshs. 5,200,000,000, a net deficit of Kshs. 12,500,000,000: section 384 (2). A second independent audit by Grant Thornton corroborates the position.

On 25th March, 2026, the High Court (Hon. Lady Justice Dr. Githiru Freda Mugambi) granted an order *ex parte* in the following terms: (a) the Company, its directors, officers, agents and servants are restrained from disposing of, selling, transferring, encumbering, charging or otherwise dealing with any asset of the Company; and (b) the Company is restrained from transferring, disposing of or encumbering any shares held by the Company in any subsidiary or affiliated entity, pending the hearing and determination of the Petition.

By operation of section 431(3) of the Insolvency Act, 2015, liquidation is deemed to have commenced on 17th March, 2026. Pursuant to section 429, any disposition of the Company's property or transfer of shares made after that date without the sanction of the Court is void as a matter of law. Any party that received a payment, asset or transfer from the Company after 17th March, 2026 may be required to restore such value to the insolvent estate.

The matter returns before the Court on 27th May, 2026 for further directions. All creditors and affected parties are notified accordingly.

NOTICE TO CREDITORS

Any party holding deposits, investment certificates, loans or any other financial exposure with the Company must take note of the following. First, creditors should immediately quantify and document all claims and accrued interest in preparation for lodgement of formal proofs of debt in the prescribed Form No. 5 under the Insolvency (General) Rules, 2016, upon appointment of a liquidator. Second, creditors who received any payment from the Company after 1st January, 2024 should urgently seek legal advice on exposure to challenge as an unfair preference under sections 558 and 559 of the Act. Third, any payment or transfer received from the Company after 17th March, 2026 is void by operation of section 429 and requires immediate legal advice. Creditors who do not act before 27th May, 2026 risk being bound by outcomes determined in their absence.

LEAD COUNSEL FOR THE PETITIONER

Allan Mulama Advocates act as lead counsel for the Petitioner in these proceedings. Creditors and affected SACCOs with exposure to the Company are invited to contact the firm for a confidential consultation on their specific position, preparation and lodgement of proofs of debt, and representation at the *inter partes* hearing on 27th May, 2026.

COMPLETION OF PART DEVELOPMENT PLAN

Title of the Plan: R2141/2026/01; Morijo Market Centre Local Physical & Land Use Development Plan, Loita

PURSUANT to the provisions of section 49 (1) of the Physical and Land Use Planning Act, 2019, notice is given that the preparation of the above plan was on the 13th day of March, 2026 completed.

The plan relates to land situated within the aforesaid market centre and the immediate surroundings within Morijo Trading Centre. The Ten (10) year medium term development plan once completed will:

1 Facilitate survey of parcels and preparation of title deeds;

2 Provide through adequate provision of land, a spatial framework for upgrading infrastructural facilities and services;

3 Provide a framework for development control by suggesting appropriate land use densities , development and activity guidelines;

4 Identifying environmentally fragile areas and suggesting measures to ensure their protection;

5 Provide a framework to unlock to the real socio-economic potential of the urban centre by suggesting measures to deal with underlying problems and for the exploitation of existing opportunities.

Copies of the draft development plan as prepared has been deposited for public inspection, free of charge at the office of the CECM, Lands, Housing, Physical Planning and Urban Development (Municipality Office, Narok Town) and Ward Administrator, Loita Ward (Office at Entasekera Market Centre) between the hours of 8.00 a.m. and 5.00 p.m. Monday to Friday and the County Government website (www.narok.go.ke).

Any interested person who wishes to make any representation in connection with or objection to the above development plan may within sixty (60) days send the same to County Executive Committee Member, Lands, Housing, Physical Planning and Urban Development, P.O. Box 898-20500, Narok Town (Email: lands@narok.go.ke) and such representations or comments shall state the grounds upon which they are made.

Dated this 19th March, 2026.

NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED RESIDENTIAL DEVELOPMENT ON PLOT L.R. NO. NAIROBI/BLOCK 4/188 LOCATED ALONG SPORTS ROAD IN WESTLANDS AREA, NAIROBI CITY COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to section 59 of the Environmental Management and Co-ordination Act, 1999, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, Mettle Terra Development Limited proposes to construct an 18 storey residential building (2No. basements, ground floor, mezzanine floor, 18No. floors and a rooftop) comprising a total of 391 units (126 No. Studio units, 133 No. One bedroom units, 75 No. Two bedroom units, 38 No. Three bedroom units and 19 Four bedroom units) including swimming pool, sauna, gym, changing rooms, restaurant, kids play area, parking spaces, lifts, other associated facilities and amenities located on plot L.R. No. Nairobi/ Block 4/ 188 located along Sports Road in Westlands Area, Nairobi City County.

The following are the anticipated impacts and proposed mitigation measures:

Impact	*Mitigation Measures*
Sound and vibrations pollution from construction machinery and vehicle movements.	• Vehicles to move at low speed while within and around the site range. • Workers are encouraged to behave in an orderly manner. • Exposed workers will be provided with protective gear (noise muffs). • Grade sites to beneficial levels to be maintained and compensate appropriately the existing topography. • Maintain the cleanliness of the proposed development and its environs. • Use machines that are well serviced, oiled and maintained.
Dust and particulate emissions	• Workers to be provided with protective gear. • Provision of Construction masks and aprons as advised by DOSHS laws. • Observe EMCA (Air Quality Regulations, 2008) • Pursue good practices in energy use during operations and sensitize staff. • Provide appropriate personal protective equipment to site workers. • Ensure that the manuals of operations are followed to the latter to avoid possible accidents. • Ensure netting is done all around the proposed project as construction takes shape.
Effluent/waste waters	• Ensure connection to sewer line network has no spillage. • Dig drainage channels for water runoff. • Ensure that the rubbish bins are emptied whenever its full. • Get Approvals from relevant authorities regarding connections. • Do regular inspections along the draining lines to ensure no leakages.
Vegetation regeneration	• Do landscaping on completion of the proposed project. • Plant pot ornamental trees round the compound to improve the aesthetic appeal of the building. • Ensure the management company maintains all vegetation cover regularly.
Solid waste generated	• Ensure that all solid wastes are collected and segregated. • Reuse those materials that can be reused. • Contact a licensed solid waste transporter to collect solid materials leakages and/or spillages. • Minimize waste at source by clear and harmonized procurement materials.
Fire hazards	• Ensure fire extinguishers are stationed in visible places. • Security personnel and occupants to be trained in firefighting skills. • Drilling exercises to be conducted regularly. • Train some of the premises maintainers team on how to use the fire-fighting equipment.
Health and safety concerns	• Provide personnel and passers-by signages and warnings, traffic control signs and warning. • Provide for appropriate signage and warnings at work sites. • Provide appropriate Personal Protective Equipment (PPE) to site workers. • Provide for First Aid facilities as per the OSHA, 2007.
Environmental auditing	• Must be done annually to assess the efficacy of the development and how waste is being managed, the environmental status of the constructed development, security situation, health and safety of the occupants and employees among other parameters. The report will be submitted to NEMA to determine the level of compliance with EMCA regulations and implementation of this EMP.
Security	• Guarding proposed development by reputable security firm. • No outsiders should access the property without permission from the proponent. • Partnership with the neighbours to promote serenity in the area and conserve the environment. • Ensure all staff and workers at the proposed project are properly vetted.
Traffic flow	• Adequate road warning signs to traffic regulations. • Erect speed bumps where necessary. • Liaise closely with other development partners and government and council's departments to upgrade the existing road networks.
Oil leaks and spills	• Use well serviced machinery to minimize grease/oil leaks. • No major servicing of the machinery at the site. • Ensure any oil leakages are dealt with immediately and site cleaned.
High electricity demand	• Energy conservation measures to be practiced. • Energy saving bulbs to be used in the houses. • Lights to be switched off when not in use. • Provide alternative source of power e.g. Solar Panels.
Climatic change risks	• Ensure the building Foundation can stand strong earthquakes.

Impact	*Mitigation Measures*
	• Ensure there is adequate greenery within the building. • Using of Construction materials that have less carbon constituents. • Ensure drainage systems, flood drainages are cleared of any clogging. • Ensure the building adopts energy saving power generation systems like solar and installation of energy saving bulbs.

The full report of the proposed project is available for inspection during working hours at:

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED MULTIDWELLING RESIDENTIAL APARTMENTS ON NAIROBI/BLOCK 4/613 ALONG RHAPTA ROAD IN WESTLANDS AREA, WESTLANDS SUB-COUNTY WITHIN NAIROBI CITY COUNTY.

INVITATION OF PUBLIC COMMENTS

PURSUANT to section 59 of the Environmental Management and Co-ordination Act, 1999, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, Procmura Properties Limited proposes to develop 18 storey, 2 No. residential blocks (basement, ground, 18 No. floors and a roof terrace) comprising a total of 321 residential units (213 No. One bedroom units, 90 No. Two bedroom units and 18 No. Three bedroom units) including management office, reception area, gym, meeting room, swimming pool, lifts, associated facilities and amenities on plot L.R. No. Nairobi/Block 4/613 along Rhapta Road in Westlands Area, Westlands Sub-county, Nairobi City County.

The following are the anticipated impacts and proposed mitigation measures:

Impact	*Mitigation Measures*
Air, noise pollution and vibration	• Water sprinkling on driveways. • Switch off engines when not in use. • Construction work to be confined to between 8 a.m. to 6 p.m. • Provide and enforce use of PPE e.g earmuffs, aprons, gloves. • Proper servicing of machinery and equipment (oiling and greasing) - Monitor noise levels as per NEMA guidelines.
Health and safety (risks of accidents and injuries to workers)	• Education and awareness to all workers. • Procure services of a health and safety officer. • Provide First Aid Kits on site. • Proper signage and warning to public. • Provide clean water and food to the workers. • The contractor to abide by all conditions including health safety and workforce welfare. • Personnel to stick to standard operation procedures. • Personnel to wear complete protective gear. • Provision of fire-fighting equipment. • Comply with Kenyan safety policy and safe working procedures, laws and regulations.
Solid waste generation	• Ensure waste materials are disposed off to County and NEMA approved sites. • Use of the 3rs – Reduce, Re-use, Re-cycle. • Solid waste to be collected in designated areas for appropriate disposal. • Waste segregation at source. • Engage a NEMA and county licensed waste handler. • Regular inspection and maintenance of the waste disposal systems.
Excessive water demand	• Harvesting of rainwater. • Training and awareness to workers on importance of water conservation and best practices. • Encourage use of alternatives for dust control such as non-toxic biodegradable dust suppressants or polymers that require less water - Efficient water use in concrete mixing.
Liquid waste generation and management	• Availability of NCWSC trunk sewer line in the area. • Proper connection to the existing sewer line. • Regular inspection and maintenance of the waste disposal systems. • Use of separate storm water drainage channel.
Social conflict	• Encourage good relation with the neighbours through provision of employment opportunities to the community members (skilled and semiskilled). • Formation of residents association/Register with the existing association. • Improved livelihood. • Strict adherence to provided ESMP.
Security	• Secure the premise with a perimeter wall. • Installation of CCTV cameras at strategic points. • Have entry points manned 24 hours. • Construction of gate house.
Increased loading on infrastructure	• Provision of adequate parking within the facility. • Have paved driveways. • Encourage rainwater harvesting and water storage tanks.

Impact	*Mitigation Measures*
	• Provide adequate storm water management system.

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED CONSTRUCTION OF THE KISUMU–MALABA STANDARD GAUGE RAILWAY PHASE 2C

INVITATION OF PUBLIC COMMENTS

Pursuant to section 59 of the Environmental Management and Coordination Act, Cap. 387, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, Kenya Railways Corporation (KRC), proposes to construct the Standard Gauge Railway (SGR), Phase 2C, a track of approximately 107km from Kisumu to Malaba aimed at improving the regional connectivity from Mombasa to Malaba and Kampala with potential links to South Sudan, Rwanda and Democratic Republic of Congo.

The following are the anticipated impacts and proposed mitigation measures:

Impacts	*Mitigation Measures*
Vegetation clearance/ clearance of urban and farm trees	• Equipment and tools brought in for reuse from other project sites should be screened and cleaned of alien / invasive propagules to avoid introduction in the project area. • Borrow sites should be inspected for invasive and colonizer propagules. • Restrict vegetation clearing to demarcated project site boundaries. • Establishment of woodlots on affected farms to help restore tree cover. • Limiting clearing to the smallest area necessary for the project to reduce habitat loss and soil exposure. • Implement tree planting programs to replace cleared trees. • Work with farmers to promote agro-forestry initiatives.
Disturbance of indigenous forests	• Align project elements (e.g. access roads, utility corridors) along disturbed or degraded areas. • stablish and maintain buffer zones around high-value conservation areas, riparian zones, and wetlands. • Safely relocate fauna from the project area in co-ordination with wildlife authorities, especially for species with limited mobility or breeding grounds. • Involve local communities in forest protection, replanting, and monitoring initiatives. • Provide support for non-forest-based income activities (e.g., beekeeping, agroforestry, eco-tourism) to reduce pressure on forest resources.
Loss of pasture for livestock and wildlife	• Incorporate wildlife corridors and livestock crossings (underpasses and overpasses) to ensure safe and uninterrupted movement to pasture areas. • Ensure transparent and timely disclosure of all relevant project information, particularly concerning activities that may affect local communities' rights, land use, and livelihoods. • Provide advance notice to local farmers, allowing sufficient time for the harvesting of grass.
Oil spillage	• Develop a site-specific SPCC plan. • Store oil and fuel in tanks or containers with bunds or drip trays capable. • Regularly inspect construction machinery for leaks in hydraulic systems, fuel tanks, and lubrication lines. • Ensure that all construction equipment is well-maintained to prevent accidental leaks.
Blasting and rock excavation	• Blasting should be carried out in accordance with a site-specific Blast Management Plan (BMP). • Establishment of blast exclusion zones with proper signage and fencing to restrict access during detonation. • Implementing dust suppression strategies, such as water spraying and wind barriers, should be implemented before and after blasting.
Poor disposal of excavated materials and equipment	• Separate excavated materials into reusable and non-reusable/spoiled materials. • Use inert excavated materials for backfilling, slope stabilization, or forming embankments. • Transport non-reusable materials to approved dumping sites. • Salvage metals, rubber parts, and electronics for recycling through licensed waste handlers.
Soil erosion	• Conduct geotechnical and hydrological assessments to identify erosion-prone zones. • Develop erosion susceptibility maps to inform alignment design, cut-and-fill balances, and drainage planning. • Schedule earthworks during dry seasons to minimize rainfall-induced erosion.

Impacts	*Mitigation Measures*
	• Replant native grasses, shrubs, or fast-growing groundcover species as soon as construction is complete in each section.
Slope destabilization	• Minimize the number of cut-and-fill earthworks by optimizing rail alignment and grading plans. • Install subsurface and surface drainage (e.g., French drains, interceptor ditches, and weep holes in retaining walls) to prevent water accumulation that weakens soil.
Climate change	• Minimize vegetation clearance by optimizing the construction corridor and integrating natural landscape features into the design where possible. • Implement carbon offset measures, such as reforestation or afforestation programs. • Incorporate climate resilience and low-carbon strategies into regional development planning to ensure that induced growth does not exacerbate environmental degradation.
Dust emission	• Clear only the areas required for immediate work to reduce the amount of exposed, dust-prone soil. • Apply water to lose soil prior to and during earthworks (excavation, grading, backfilling) to suppress dust at the source. • Regularly spray water or non-toxic dust suppressants on access and haul roads, especially during dry or windy conditions. • Minimize drop heights when loading or unloading fine materials like sand or ballast, and use enclosed conveyors or hoppers when available.
Hydrology and water quality degradation	• Install geotextile silt fences or sediment traps around exposed soils, stockpiles, and drainage paths to intercept suspended solids. • Construct temporary settling basins to capture and treat stormwater runoff from construction areas before discharge into natural water bodies. • Treat wastewater from concrete batching, equipment washing, or drilling using sediment traps or pH neutralization before discharge. • Prohibit direct discharge of untreated wastewater or sewage into rivers, lakes, wetlands, or groundwater. • Maintain buffer zones (e.g., 30 meters) along rivers and streams to act as natural filters. • Avoid construction in or near wetlands; where unavoidable, apply wetland restoration and compensation measures.
Solid waste generation	• Prioritize options of waste reduction, reuse and recycling. • Soil emanating from excavations will be reused for landscaping followed by revegetation of the landscaped areas. • Contract a NEMA certified waste collection firm to collect solid waste for disposal.
Noise and vibrations	• Plan high-noise activities during daytime hours (e.g. 08:00–17:00) to minimize impact on nearby communities. • Use new or well-maintained machinery designed with noise-reducing features (e.g. mufflers, silencers, acoustic enclosures). • Erect movable noise barriers (e.g. acoustic curtains, sound-insulating panels) around high-noise equipment like generators and compressors. • Implement traffic management plans to reduce vehicle idling and control speeds on site to reduce noise and vibration from transport.
Disruption of public utilities	• Co-ordinate with utility service providers and local authorities to map existing underground and overhead infrastructure accurately. • Integrated comprehensive surveys and utility mapping, coupled with robust monitoring frameworks. • Prepare detailed relocation plans approved by utility providers and schedule works during off-peak hours or planned outages. • Install protective barriers, sleeves, or encasements around utilities that are close to excavation or piling activities.
Poor site management and control leading to accidents and incidences	• Nominate persons with defined responsibility for EHS. • Through relevant training, ensure everyone on site is aware of their responsibilities and liabilities with respect to the environment. • Through site induction, make staff and visitors aware of Project environmental issues and environmental standards.
Road accidents	• Any abnormal loads for the project must be transported in line with the traffic rules, including public notification and use of escort cars. • Sensitize project staff on risks of over speeding while on site. • Erect warning signs for approaching drivers at the points of entry to the project site.
Disputes over employment	• Develop a grievance management system to manage grievances arising from the local labour force. • Develop local labour recruitment plans, including disclosure of opportunities and partnership building with local support agencies / institutions.
Oil spillage	• Recovered oil and oily residues should be handled as hazardous waste and appropriate disposal methods used including selling the waste oil to licensed recyclers or re-refiners. • Install high-temperature incineration in approved facilities, which ensures complete combustion of organic compounds and prevents groundwater contamination. • Conduct regular environmental audits, soil and water quality assessments, and hydrocarbon concentration monitoring, particularly in drainage pathways leading from the rail yard.

Impacts	*Mitigation Measures*
Air emissions	• Employ advanced engine technologies with Diesel Particulate Filters (DPFs), and selective catalytic reduction (SCR) systems to reduce NO_x and PM emissions. • Application of water sprays, chemical suppressants, and use of covered conveyors or enclosed handling facilities to reduce particulate matter during material transport and transfer operations. • Continuous ambient air quality monitoring near sensitive receptors and rail yard boundaries should be conducted to inform adaptive management.
Solid waste generation	• Implement a comprehensive Waste Management Plan (WMP) encompassing waste minimization, segregation, and recycling strategies. • Training of staff and public awareness campaigns to reduce littering and promote responsible waste disposal. • Engagement with licensed waste handlers for safe disposal of hazardous wastes such as oils, solvents, and batteries in compliance with local regulations and international best practices.
Wildlife and livestock accidents due to breached fence	• Conduct wildlife movement and behavior studies to identify high-crossing zones and optimize the placement of underpasses. • Utilize fencing materials that balance strength, flexibility, and visibility to reduce damage by animals and humans. • Design underpasses with appropriate dimensions, lighting, and natural substrate to encourage regular animal use. • Engage local communities and stakeholders in awareness programs to minimize human interference with fencing infrastructure.
Noise and vibration	• Use ballast mats, under-sleeper pads, or floating slab track systems to absorb and dissipate vibration energy before it transmits to the ground. • Set speed limits in vibration-sensitive zones to significantly reduce both the amplitude and frequency of vibration. • Maintain appropriate setback distances between the railway and residential or sensitive land uses to prevent significant impacts. • Conduct noise and vibration monitoring to establish baseline levels and assess the effectiveness of mitigation measures as per EMCA (Noise and Excessive Vibration Pollution) (Control) Regulations, 2009. • Workers performing in noisy working environment shall be provided with suitable ear protectors based on the expected noise levels.
Climate change	• Adoption of low-emission locomotives, including electrified rail systems or hybrid alternatives to diesel engines. • Energy-efficient station infrastructure, powered by renewable energy sources (e.g., solar PV systems). • Afforestation or reforestation programs to offset unavoidable emissions and enhance carbon sequestration. • Integration of climate risk assessments into infrastructure design to ensure climate-resilient development and reduce vulnerability to climate variability.
Flooding/water ponding	• Integrate appropriately sized and strategically placed culverts, box drains, or small bridges along the embankment to allow unimpeded flow of water. • Ensure drainage structures are designed to handle peak flows based on historical flood data and climate change projections. • Consider vegetative stabilization techniques to improve slope integrity and absorb runoff. • Implement a maintenance schedule to inspect drainage structures for blockages or sedimentation and monitor embankment stability, especially during and after heavy rainfall.
Energy consumption	• Use energy-efficient lighting (e.g., LED) in stations, offices, and maintenance yards. • Install solar panels at stations, signal systems, and maintenance yards for lighting and low-load applications. • Introduce or upgrade to electric or hybrid locomotives, where infrastructure allows.
Occupational health and safety of workers and visitors	• Ensure compliance with all standards and legally required health and safety regulations as per OSHA, 2007 revised in 2010. • Attach a full-time qualified safety and Health Officer. • Provision of a standard First Aid kit and serviced Fire extinguishers at the railway stations at all times and train first aiders. • Maintain an accident register and carry out accident and incidents investigations and implement corrective actions. • Installation and maintenance of warning signage and emergency contacts at appropriate locations depending on the hazards.

IMPORTANT NOTICE TO SUBSCRIBERS TO THE KENYA GAZETTE

THE following notes are for the guidance of persons submitting "copy" for inclusion in the *Kenya Gazette, Supplement*, etc.:

(1) *The Kenya Gazette* contains Notices of a general nature which do not affect legislation. They are, therefore, submitted to the Government Printer directly.

(2) *Legislative Supplement* contains Rules and Regulations which are issued by the National or County Governments. Because of this, they must be submitted to the Government Printer through the office of the Attorney–General.

(3) *Bill Supplement* contains Bills which are for introduction in the National Assembly, Senate or County Assemblies.

(4) *Act Supplement* contains Acts passed by the National Assembly, Senate or County Assemblies.

All "copy" submitted for publication should be prepared on one side of an A4 sheet no matter how small the Notice is, each page being numbered and should be typed with double spacing. Copy should be Clear, legible and contain no alterations.

Particular attention should be paid to the following points:

(i) Signature must be supported by rubber–stamping or typing the name of the signatory in capital letters.

(ii) Must be correct and filled in where necessary.

(iii) Care should be taken to ensure that all headings to Notices and references to legislation are up to date and conform with the Revised Edition of the Laws of Kenya.

EXTRACT FROM THE HUMAN RESOURCE POLICIES AND PROCEDURES MANUAL FOR THE PUBLIC SERVICE —

Kenya Gazette

A.30 (1) All communication for publication in the *Kenya Gazette* should reach the Government Printer not later than Friday of the week before publication is desired.

(2) A State Department will be required to meet the cost of advertising in the *Kenya Gazette*.

It is emphasized that these notes are for guidance only, but it is requested that persons submitting copy for publication first satisfy themselves that such copy is complete in every respect.
